

## **RxNorth.com's Follow-Up Statement Regarding the Recent FDA Warning**

**Minnedosa, Manitoba, August 31, 2006** - Officials at RxNorth.com were apprised of the FDA statement that was released yesterday, August 30, 2006, through the same media reports as the general public. As yet, we have not received any information whatsoever from the parties involved on the nature of these warnings or any test results that FDA has conducted.

As a result, and in the spirit of cooperation, we have asked our legal council in the United States to meet with FDA officials to determine the issues that prompted their warnings. That meeting is currently taking place.

As it has been since we first opened our doors, our primary concern is the health and well-being of our customers and the public's safety in general. In the spirit of cooperation, we have voluntarily suspended the distribution of all the products in question until such time that we have a better understanding of the situation.

RxNorth.com will continue to work closely with the FDA to expedite the investigative process so that we can vindicate our good name and continue to serve Americans in need of safe, low-cost chronic care medication.

### **About RxNorth.com:**

**RxNorth.com** is an award-winning Canadian Internet pharmacy that revolutionized the prescription drug dispensing process and set the standard for direct mail and Internet pharmacies across North America. The company is recognized throughout the industry for their commitment to safety, security and providing affordable prescription medication. Carrying over 1,800 brand name and generic prescription drugs at prices well below those of many leading U.S. pharmacies, RxNorth.com has filled over 1.8 million prescriptions since 1999 and served over 200,000 customers across North America.
